

S717 Patio Door... The REHAU Benefits

We make a great team

REHAU®

The REHAU S717 Patio Door brings you all the benefits with none of the hassles... perfect for modern living.

- Low maintenance
- Superb looks
- Improved insulation
- Enhanced security
- Extensively tested
- Wide range of options
- Increased safety

When selecting your REHAU patio door, we advise you to work closely with your local fabricator/installer on all aspects of the specification.

Just as REHAU is expert in designing door and window systems, so your local company is experienced in fabricating and/or installing made-to-measure doors and windows.

Your fabricator/installer will also be able to give you professional advice on your particular requirements.

Take your next step with REHAU... through a REHAU S717 Patio Door.

Doors, Windows, Porches and Conservatories

Why not ask us for a brochure on any of the other PVC-U products that we offer? Possessing the same durability, increased security and low maintenance as our patio doors, all our products are available in a range of different sizes and styles to suit individual homes.

Remember...

It is important for REHAU to have a partnership of excellence with its fabricators/installers in order to provide you the customer with a quality service.

Throughout this brochure, we have armed you with the relevant information to ensure you receive a first class service from an expert designer of door and window systems.

houses

Add light and freedom to any home

A door is a key factor in giving a home its own character and personality. When considering replacement doors, whether entrance or patio style, you need to be sure they will look just right and complement the style of a home.

The S717 Patio Door uses PVC-U profiles from REHAU, Europe's leading profile manufacturer with over 40 years' experience, for a classic looking door featuring maximum glass area for optimum visibility.

PVC-U provides extra warmth, draught and soundproofing and can't swell, shrink or rot. No more draughts, leaks or noise intrusion ... just slide the door shut and leave the world outside.

This beautiful Patio Door from REHAU will grace any home, adding light and freedom in all situations, whether as a traditional patio door, entrance door or in a conservatory.

S717 Patio Door ... The REHAU Benefits

Low maintenance

Our PVC-U patio door really couldn't require less maintenance. It can't swell, shrink, spoil or rot with time and will never warp, flake or peel, so no more sanding, planing or painting ever again. Just occasionally oil the locks and gently rub the frames over with a mild detergent to keep them at their best.

Neat finishing profiles include a unique integral door stop with specially designed details for easy cleaning. The use of an aluminium running track ensures smooth opening and closing for long term performance.

Unique door stop

Superb looks

The slim S717 is available in standard white and mahogany foiled finishes to suit different house styles. Slim sightlines mean maximum glass area for optimum visibility, great for use in

conservatories and porches. Our doors are made to last and, with fully welded construction, the design ensures increased rigidity and long life, even in the toughest conditions.

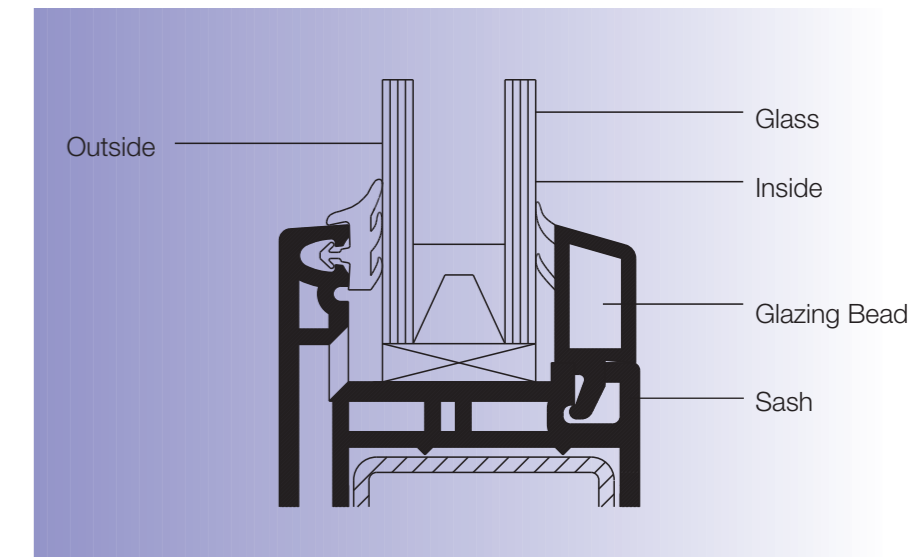

Improved insulation

With the new S717 Patio Door, a twin chamber construction gives excellent thermal characteristics. PVC-U is a very poor conductor of heat and therefore makes an excellent insulator. This conserves energy to reduce heating bills.

A twin weatherseal between sash and frame keeps the cold out, while dense brushpile seals incorporate polyethylene weatherfins to prevent rain ingress.

The latest sealing technology and modern sealed double glazing units mean an end to those annoying draughts. The profiles are also designed to minimise sound transmission, so allowing occupants of the house to relax undisturbed.

Enhanced security

Security has to be high on any list of priorities concerned with access and exit from a building. The S717 Patio Door features internal glazing, where the beads are fixed on the inside, which helps prevent the glazing being removed from the outside.

In addition, the main PVC profiles are fully reinforced with galvanised steel. This makes them extremely difficult to cut or bend, minimises deflection and improves the strength of all screws and locks.

Options include the latest multi point locking devices with in-built 'anti lift' technology. Ask us for more details!

Testing

The S717 Patio Door has been extensively tested in-house by REHAU engineers.

Wide range of options

Our diverse range of styling options means individuality can really be shown. The REHAU S717 Patio Door is available in 2, 3 or 4 pane options in the standard white finish or a mahogany foiled finish. The more common choice of glass thickness is 24mm, but 20 or 28mm thicknesses can be specified if desired.

To ensure the S717 Patio Door reflects individual house styles, an attractive range of accessories is also available. Please ask for more details.

Increased safety

All glazed entrance doors are fitted with glass to meet BS6262 requirements for extra strength and for peace of mind. Another key safety benefit is that PVC-U is self-extinguishing and will not burn unless exposed to a powerful and continuous heat source.
